“Predestination was one of the most widely discussed theological topics in the late sixteenth and early seventeenth centuries and one of the most complex. .... In England, the preparation of the Lambeth Articles by prominent Anglican divines for the purpose of settling a theological dispute at Cambridge University served as a kind of flash point in the discussion: they were intended by their authors to explain what was, in their minds, the consensus interpretation of the position outlined in the Thirty-Nine Articles, but they had instead the unintended consequence of clarifying how fragile, even non-existent, the consensus position was”. -- Intro. p. 3.
